### MONTHLY SUMMARY

The MGGF returned 0.6% over the month of February. The Fund's long investments detracted 5.4% to monthly performance but this was cushioned by short positions and hedging, adding 4.1%. The Australian Dollar depreciated 3.4% during the month which added 1.9% due to the Fund's 55% holding in USD. Most major equity market indices were down between 6% and 10% for the month as the Coronavirus spread outside of China, with the market starting to price in the subsequent negative effects on corporate earnings. The Fund benefited significantly from owning put options on the S&P 500 which were predominately banked at the end of the month. Elsewhere, long-held short positions in oil majors, (Exxon, Chevron), advertising agencies (Publicis, Dentsu), and luxury goods maker Swatch all contributed to monthly performance. The long portfolio suffered due to the market downturn but we see limited changes to its long term outlook.
