MONTHLY SUMMARY

The Munro Global Growth Fund returned -1.5% in March. The Fund's long positions detracted 1.3%, shorts and hedging detracted 0.9%, while currency added 0.7%. Global equity markets had another positive month in March. However, the strong market performance masked significant volatility under the surface as leadership rotated aggressively towards more cyclical stocks that would benefit from the "re-opening" of businesses and economies, generally at the expense of longer duration assets like bonds, gold and growth equities. Key contributors included Climate beneficiaries Darling Ingredients and Enel, and High Performance Computing winner, ASML. The main detractors for the Fund were smaller market cap technology holdings. On equities markets more broadly, we remain positive. COVID ending is good for growth and good for corporate earnings.
